

The Pfizer-BioNTech COVID-19 vaccine has not been approved or licensed by the U.S. Food and Drug Administration (FDA), but has been authorized for emergency use by FDA under an Emergency Use Authorization (EUA) to prevent Coronavirus Disease 2019 (COVID-19) for use in individuals 16 years of age and older. The emergency use of this product is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of the medical product under Section 564(b)(1) of the FD&C Act unless the declaration is terminated or authorization revoked sooner.

Please see EUA Fact Sheet at www.cvdvaccine.com

WHO SHOULD GET VACCINATED

The Pfizer-BioNTech vaccine is recommended for people aged 16 years and older.

WHO SHOULD NOT GET VACCINATED

If you have had a severe allergic reaction (anaphylaxis) or an immediate allergic reaction—even if it was not severe—to any ingredient in an mRNA COVID-19 vaccine (such as polyethylene glycol), you should not get an mRNA COVID-19 vaccine. An allergic reaction is considered severe when a person needs to be treated with epinephrine or EpiPen® or if they must go to the hospital. An immediate allergic reaction means a reaction within 4 hours of getting vaccinated, including symptoms such as hives, swelling, or wheezing (respiratory distress).

If you have had a severe allergic reaction (anaphylaxis) or an immediate allergic reaction—even if it was not severe—after getting the first dose of the vaccine, you should not get a second dose of either of the mRNA COVID-19 vaccines.

If you aren't able to get an mRNA COVID-19 vaccine, you may be able to get a different type of COVID-19 vaccine.

COMMON SIDE EFFECTS

Side effects that have been reported include the following:

- In the arm where you got the shot: pain, redness, swelling
- Throughout the rest of your body: tiredness, headache, muscle pain, chills, fever, nausea

Side effects usually start within a day or two of getting the vaccine. Side effects might affect your ability to do daily activities, but they should go away in a few days. Most side effects were mild to moderate. However, a small number of people had severe side effects, defined as side effects affecting a person's ability to do daily activities. Side effects throughout the body were more common after the second dose of the vaccine.

WHEN TO CALL THE DOCTOR

In most cases, discomfort from pain or fever is a normal sign that your body is building protection.

Contact your doctor or healthcare provider:

- If the redness or tenderness where you got the shot gets worse after 24 hours
- If your side effects are worrying you or do not seem to be going away after a few days

If you get a COVID-19 vaccine and you think you might be having a severe allergic reaction after leaving the vaccination site, seek immediate medical care by calling 911.

Report vaccine side effects to FDA/CDC Vaccine Adverse Event Reporting System (VAERS). The toll-free number is [1-800-822-7967](tel:1-800-822-7967) or report online to <https://vaers.hhs.gov/reportevent.html>.

justify the emergency use of drugs and biological products during the COVID-19 pandemic.

The Pfizer-BioNTech COVID-19 Vaccine has not undergone the same type of review as an FDA-approved or cleared product. FDA may issue an EUA when certain criteria are met, which includes that there are no adequate, approved, available alternatives. In addition, the FDA decision is based on the totality of scientific evidence available showing that the product may be effective to prevent COVID-19 during the COVID-19 pandemic and that the known and potential benefits of the product outweigh the known and potential risks of the product. All of these criteria must be met to allow for the product to be used in the treatment of patients during the COVID-19 pandemic.

The EUA for the Pfizer-BioNTech COVID-19 Vaccine is in effect for the duration of the COVID-19 EUA declaration justifying emergency use of these products, unless terminated or revoked (after which the products may no longer be used).
